Arise One Platform (AOP) API Documentation

1. Auth Api (Authentication Token Generation)

Purpose: Generate JWT token for API access based on user credentials Method: POST Endpoint: /auth/token Request Body (all required): • userId (string): User identifier role (string): User role (super_admin, zone_admin, normal_user) • zone (string): Zone/Country name Request Example { "userId": "user_001", "role": "zone_admin", "zone": "Gabon" Authorization: None required Response (200 OK) "token": "eyJhbGciOiJIUzl1NilsInR5cCl6lkpXVCJ9.eyJpYXQiOjE3MTkwMDAwMDAsImV4cCl6MTcxO TAwMzYwMCwidXNlcklkIjoidXNlcl8wMDEiLCJyb2xlljoiem9uZV9hZG1pbilsInpvbmUiOiJHY WJvbilsInBlcm1pc3Npb25zljp7InJlYWQiOlsicGxvdHMiLCJ6b25lcyIsInJlcG9ydHMiXSwid3Jp dGUiOlsicGxvdHMiLCJ6b25lcyJdfX0.signature_here" } Response (400 Bad Request) "error": "INVALID ROLE",

"message": "Role must be: super_admin, zone_admin, or normal_user"

```
Response (400 Bad Request)

{
    "error": "INVALID_ZONE",
    "message": "Invalid zone provided"
}

Response (400 Bad Request)

{
    "error": "MISSING_PARAMETERS",
    "message": "userId, role, and zone are required"
}
```

| Eleme nt | Data Type | Length | Mandatory/Option al | Description |
|-------------|--------------|--------|---------------------|--|
| userld | String | N/A | Mandatory | User identifier |
| role | String | N/A | Mandatory | User role (super_admin, zone_admin, normal_user) |
| zone | String | N/A | Mandatory | Zone/Country name |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optional | Description |
|---------|-----------|--------|--------------------|--------------------|
| token | String | N/A | Mandatory | JWT authentication |
| | | | | token |

```
Response (400 Bad Request)
"error": "INVALID_ROLE",
"message": "Role must be: super_admin, zone_admin, or normal_user"
}
Response (400 Bad Request)
"error": "INVALID_ZONE",
"message": "Invalid zone provided"
}
Response (400 Bad Request)
"error": "MISSING_PARAMETERS",
"message": "userId, role, and zone are required"
}
1.2 JWT Token Structure
Header
"alg": "HS256",
"typ": "JWT"
Payload (decoded content)
"iat": 1719000000,
```

```
"exp": 1719003600,
"userId": "user_001",
"role": "zone_admin",
"zone": "Gabon",
"permissions": {
    "read": ["plots", "zones"],
    "write": ["plots", "zones"]
}
```

Claims Description

- iat: Token issued at time (Unix timestamp)
- exp: Token expiration time (Unix timestamp) 24 hour from issue
- userld: User identifier from request
- role: User role from request
- zone: Zone/Country from request
- permissions: Auto-assigned based on role

1.3 Role-Based Permissions

super_admin

- read: ["plots"]
- write: ["plots"]

zone_admin

- read: ["plots"]
- write: ["plots"] // for particular zone only

normal_user

- read: ["plots"]
- write: []

1.4. Using Generated Token

For subsequent API calls, include token in Authorization header:

Header Format

Authorization: Bearer eyJhbGciOiJIUzl1NilsInR5cCl6lkpXVCJ9...

Example API Call

GET /plots/available?country=Gabon&zoneCode=GSEZ&category=Residential Authorization: Bearer eyJhbGciOiJIUzI1NiIsInR5cCl6lkpXVCJ9...

2. Available Plots Retrieval

Purpose: Populate the "Available Plots" dropdown during customer lead registration.

Method: GET

Endpoint: /plots/available

Query Parameters (all required):

- country (string): country name Code
- zoneCode (string): Zone identifier
- category (string): Plot category (e.g., Residential, Commercial)
- phase (string): Development phase (currently don't have)

Request Example

/plots/available?country=Gabon&zoneCode=GSEZ&category=Residential&phase=2

Authorization:

Bearer <token>

```
Response (200 OK)

{
    "plots": [
      {
          "plot": "Block A-12",
          "plotStatus": "Available",
          "category": "Residential",
          "phase": "2",
          "areaInSqm": 250.5,
          "areaInHa": 0.025
      }]}
```

Message Elements - Query Parameters

| Element | Data Type | Length | Mandatory/Optional | Description |
|----------|-----------|--------|--------------------|---|
| country | String | N/A | Mandatory | Country name/code |
| zoneCode | String | N/A | Mandatory | Zone identifier |
| category | String | N/A | Mandatory | Plot category (Residential, Commercial) |
| phase | String | N/A | Mandatory | Development phase |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optional | Description |
|------------|----------------|--------|--------------------|-----------------------|
| plot | String | N/A | Mandatory | Plot identifier |
| plotStatus | String | N/A | Mandatory | Current plot status |
| category | String | N/A | Mandatory | Plot category |
| phase | String | N/A | Mandatory | Development phase |
| arealnSqm | Number (Float) | N/A | Mandatory | Area in square meters |
| arealnHa | Number (Float) | N/A | Mandatory | Area in hectares |

```
Response (401 Unauthorized)
{
    "error": "UNAUTHORIZED",
    "message": "Invalid or missing authorization token"
```

```
}
Response (400 Bad Request)
{
"error": "INVALID_PARAMETERS",
"message": "Missing required query parameters"
}
Response (404 Not Found)
{
"error": "NOT_FOUND",
"message": "No plots found for specified criteria"
}
3. Plot Update
Purpose: Synchronize plot metadata and reflect in UI
Method: PUT
Endpoint: /update-plot
Request Body
"country": "Gabon",
"zoneCode": "GSEZ",
 "phase": "2",
"plotName/plotNumber": "Block A-12",
 "companyName": "",
 "sector": "Timber",
 "activity": "furniture",
 "plotStatus": "Occupied",
```

```
"operationalStatus": "Active",
"remark": "East facing plot", // optional
"logo": "url" // optional
}

Authorization:

Bearer < token>
```

Responses

• 200 OK: { "message": "Plot A-12 updated successfully." }

Message Elements - Request Body

| Element | Data Type | Length | Mandatory/Optional | Description |
|-------------------------|-----------------|--------|--------------------|---------------------|
| country | String | N/A | Mandatory | Country name |
| zoneCode | String | N/A | Mandatory | Zone identifier |
| phase | String | N/A | Mandatory | Development phase |
| plotName/plotNu mber | String | N/A | Mandatory | Plot name or number |
| companyName | String | N/A | Mandatory | Company name |
| sector | String | N/A | Mandatory | Business sector |
| activity | String | N/A | Mandatory | Business activity |
| plotStatus | String | N/A | Mandatory | Plot status |
| operationalStatus | String | N/A | Mandatory | Operational status |
| remark | String | N/A | Optional | Additional remarks |
| logo | String (URL) | N/A | Optional | Company logo URL |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optio nal | Description |
|---------|-----------|--------|---------------------|------------------------------|
| message | String | N/A | Mandatory | Success confirmation message |

```
Response (401 Unauthorized)
{
"error": "UNAUTHORIZED",
"message": "Invalid or missing authorization token"
}
Response (403 Forbidden)
"error": "FORBIDDEN",
"message": "Insufficient permissions to update plot"
}
Response (400 Bad Request)
{
"error": "INVALID_PLOT",
"message": "Plot not found or invalid plot identifier"
}
Response (400 Bad Request)
"error": "MISSING_PARAMETERS",
"message": "Required parameters missing"
}
Response (400 Bad Request)
```

```
{
  "error": "VALIDATION_ERROR",
  "message": "Invalid data format or values"
}
```

4. Plot Release

Purpose: Mark a plot as Available when released

Method: PATCH

Endpoint: /release-plot

Request Body

```
{
  "country": "Benin",
  "zoneCode": "GDIZ",
  "plotStatus": "available",
  "plotNumber/plotName": "Block A-12"
}
```

Authorization:

Bearer <token>

Behavior

Sets plotStatus to 'Available'

Response

• 200 OK: { "message": "Block Plot A-12 released and marked Available." }

| Element | Data Type | Length | Mandatory/Optional | Description |
|-------------------------|-----------|--------|--------------------|-------------------------------------|
| country | String | N/A | Mandatory | Country name |
| zoneCode | String | N/A | Mandatory | Zone identifier |
| plotStatus | String | N/A | Mandatory | Plot status (should be 'available') |
| plotNumber/pl otName | String | N/A | Mandatory | Plot number or name |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optional | Description |
|---------|-----------|--------|--------------------|----------------------|
| message | String | N/A | Mandatory | Success confirmation |
| | | | | message |

Error Responses

```
Response (401 Unauthorized)

{
    "error": "UNAUTHORIZED",
    "message": "Invalid or missing authorization token"
}

Response (403 Forbidden)

{
    "error": "FORBIDDEN",
    "message": "Insufficient permissions to release plot"
}
```

Response (400 Bad Request)

```
{
  "error": "INVALID_PLOT",
  "message": "Plot not found or invalid plot identifier"
}

Response (400 Bad Request)
{
  "error": "MISSING_PARAMETERS",
  "message": "Required parameters missing"
}

Response (400 Bad Request)
{
  "error": "INVALID_STATUS",
  "message": "Invalid plot status for release operation"
}
```

5. Zone Master

Purpose: Single source of truth for zone metadata

Method: POST

Endpoint: /country/zones

Request Body:

```
{
"country": "Gabon",
"zoneCode": "GSEZ",
"phase": "1",
```

```
Responses

• 200 OK:

{
"country": "Gabon",
"zoneCode": "GSEZ",
"phase": "1",
"landArea": "120 Ha"
}
```

"landArea": "120 Ha"

Message Elements - Request Body

| Element | Data Type | Length | Mandatory/Optional | Description |
|----------|--------------|--------|--------------------|----------------------------------|
| country | String | N/A | Mandatory | Country name |
| zoneCode | String | N/A | Mandatory | Zone identifier |
| phase | String | N/A | Mandatory | Development phase |
| landArea | String | N/A | Mandatory | Land area (with unit, e.g., "120 |
| | | | | Ha") |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optional | Description |
|--------------|-----------|--------|--------------------|---------------------|
| country | String | N/A | Mandatory | Country name |
| zoneCod e | String | N/A | Mandatory | Zone identifier |
| phase | String | N/A | Mandatory | Development phase |
| landAre a | String | N/A | Mandatory | Land area with unit |

Error Responses

Response (401 Unauthorized)

```
"error": "UNAUTHORIZED",
"message": "Invalid or missing authorization token"
}
Response (403 Forbidden)
"error": "FORBIDDEN",
"message": "Insufficient permissions to create/update zone"
}
Response (409 Conflict)
"error": "DUPLICATE_ZONE",
"message": "Zone already exists"
}
Response (400 Bad Request)
"error": "MISSING_PARAMETERS",
"message": "Required parameters missing"
}
Response (400 Bad Request)
"error": "VALIDATION_ERROR",
"message": "Invalid data format or values"
}
```

6. Open API

Purpose: Third-party consumable endpoint

Method: GET

Endpoint: /plot-details?country=Gabon&zoneCode=GSEZ

Query Parameters:

- country (string, required)
- zoneCode (string, required)
- phase (string, optional)
- category (string, optional)

```
Response (200 OK)
{
 "metadata": {
 "country": "Gabon",
  "zoneCode": "GSEZ",
  "phase": 1,
  "category": null
},
 "plots": [
   "plotName": "Block A-12",
  "category": "Residential",
   "arealnHa": 250.5,
   "arealnSqm": 20.5,
  "sector": "Timber",
   "activity": "furniture",
  "plotStatus": "Available",
  "operationalStatus": "Pending",
  "logo": "example.png",
  "remarks": ""
 }
]
```

Message Elements - Query Parameters

| Element | Data Type | Length | Mandatory/Optional | Description |
|----------|-----------|--------|--------------------|----------------------|
| country | String | N/A | Mandatory | Country name |
| zoneCod | String | N/A | Mandatory | Zone identifier |
| е | | | | |
| phase | String | N/A | Optional | Development phase |
| category | String | N/A | Optional | Plot category filter |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optional | Description |
|---------------------------|----------------|--------|--------------------|---------------------------|
| metadata | Object | N/A | Mandatory | Request metadata |
| metadata.country | String | N/A | Mandatory | Country name |
| metadata.zoneCode | String | N/A | Mandatory | Zone identifier |
| metadata.phase | Number | N/A | Mandatory | Development phase or null |
| metadata.category | String | N/A | Mandatory | Category filter or null |
| plots | Array | N/A | Mandatory | Array of plot details |
| plots[].plotName | String | N/A | Mandatory | Plot name |
| plots[].category | String | N/A | Mandatory | Plot category |
| plots[].areaInHa | Number (Float) | N/A | Mandatory | Area in hectares |
| plots[].arealnSqm | Number (Float) | N/A | Mandatory | Area in square meters |
| plots[].sector | String | N/A | Mandatory | Business sector |
| plots[].activity | String | N/A | Mandatory | Business activity |
| plots[].plotStatus | String | N/A | Mandatory | Current plot status |
| plots[].operationalStatus | String | N/A | Mandatory | Operational status |
| plots[].logo | String | N/A | Optional | Company logo filename |
| plots[].remarks | String | N/A | Optional | Additional remarks |

```
Response (400 Bad Request)

{
    "error": "INVALID_PARAMETERS",
    "message": "Missing required query parameters (country, zoneCode)"
```

```
Response (404 Not Found)

{
    "error": "NOT_FOUND",
    "message": "No data found for specified criteria"
}

Response (500 Internal Server Error)

{
    "error": "INTERNAL_ERROR",
    "message": "Internal server error"
}
```

Common Authorization Header Format

All authenticated endpoints require:

Authorization: Bearer < JWT_TOKEN>

Common HTTP Status Codes

- 200 OK: Request successful
- 400 Bad Request: Invalid request parameters or data
- 401 Unauthorized: Invalid or missing authentication
- 403 Forbidden: Insufficient permissions
- 404 Not Found: Resource not found
- 409 Conflict: Resource already exists
- 500 Internal Server Error: Server-side error

User Management Endpoints

"error": "INVALID_ROLE",

7. Add New User

Purpose: Create a new user in the system with specified role and zone access Method: POST **Endpoint:** /create_user Request Body (all required): "email": "gabon@user.com", "role": "zone_admin", "zone": "Gabon" } **Authorization:** Bearer <token> Response (201 Created) "message": "User created successfully", "user": { "email": "john.doe@example.com", "role": "zone_admin", "zone": "Gabon", "createdDate": "2025-07-02T10:30:00Z" } } Response (400 Bad Request)

```
"message": "Role must be: super_admin, zone_admin, or normal_user"
}
Response (400 Bad Request)
"error": "INVALID_ZONE",
"message": "Invalid zone provided"
}
Response (409 Conflict)
"error": "USER_EXISTS",
"message": "User with this email already exists"
}
Response (400 Bad Request)
"error": "MISSING_PARAMETERS",
"message": "email, role, and zone are required"
}
```

| Elem ent | Data Type | Lengt h | Mandatory/Option al | Description |
|-------------|--------------|------------|---------------------|--|
| email | String | N/A | Mandatory | User email address (unique identifier) |
| role | String | N/A | Mandatory | User role (super_admin, zone_admin, normal_user) |
| zone | String | N/A | Mandatory | Zone/Country assignment |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optional | Description |
|---------|-----------|--------|--------------------|------------------------------|
| message | String | N/A | Mandatory | Success confirmation message |

| user | Object | N/A | Mandatory | Created user details |
|-----------------|-------------|-----|-----------|-------------------------|
| user.email | String | N/A | Mandatory | User email address |
| user.role | String | N/A | Mandatory | User role |
| user.zone | String | N/A | Mandatory | Zone assignment |
| user.createdDat | String (ISO | N/A | Mandatory | User creation timestamp |
| е | 8601) | | | |

Error Responses

```
Response (401 Unauthorized)

{
    "error": "UNAUTHORIZED",
    "message": "Invalid or missing authorization token"
}

Response (403 Forbidden)

{
    "error": "FORBIDDEN",
    "message": "Insufficient permissions to create user. Super admin access required."
}

Response (400 Bad Request)
```

8. Update User

}

"error": "INVALID_EMAIL",

"message": "Invalid email format"

Purpose: Update existing user role and zone assignment

Method: PUT

```
Endpoint: /update_user
Request Body:
"email": "benin@user.com",
"role": "normal_user",
"zone": "Benin"
Authorization:
Bearer <token>
Response (200 OK)
"message": "User benin@user.com updated successfully",
"user": {
 "email": "benin@user.com",
 "role": "normal_user",
 "zone": "Benin",
 "lastModified": "2025-07-02T14:25:00Z"
}
}
Response (404 Not Found)
"error": "USER_NOT_FOUND",
"message": "User with specified email not found"
}
Response (400 Bad Request)
"error": "MISSING_EMAIL",
```

```
"message": "email is required for update operation" }
```

| Element | Data Type | Lengt h | Mandatory/Optional | Description |
|---------|--------------|------------|--------------------|------------------------------|
| email | String | N/A | Mandatory | User email address to update |
| role | String | N/A | Optional | Updated user role |
| zone | String | N/A | Optional | Updated zone assignment |

Message Elements - Response (Success)

| Element | Data Type | Length | Mandatory/Optional | Description |
|-------------------|-------------------|--------|--------------------|----------------------|
| message | String | N/A | Mandatory | Success confirmation |
| | | | | message |
| user | Object | N/A | Mandatory | Updated user details |
| user.email | String | N/A | Mandatory | User email address |
| user.role | String | N/A | Mandatory | User role |
| user.zone | String | N/A | Mandatory | Zone assignment |
| user.lastModified | String (ISO 8601) | N/A | Mandatory | Last modification |
| | | | | timestamp |

Error Responses

Response (401 Unauthorized)

```
{
  "error": "UNAUTHORIZED",
  "message": "Invalid or missing authorization token"
}
```

Response (403 Forbidden)

```
{
    "error": "FORBIDDEN",
    "message": "Insufficient permissions to update this user"
}
```

```
Response (400 Bad Request)
{
"error": "INVALID_ROLE",
"message": "Role must be: super_admin, zone_admin, or normal_user"
}
Response (400 Bad Request)
"error": "INVALID_ZONE",
"message": "Invalid zone provided"
}
Response (400 Bad Request)
"error": "INVALID_EMAIL",
"message": "Invalid email format"
}
Response (400 Bad Request)
"error": "VALIDATION_ERROR",
"message": "Invalid data format or values"
}
```
